

Import requests and BeautifulSoup

In [1]:

```
import requests
from bs4 import BeautifulSoup
```

Use pssim website url

In [2]:

```
url = 'http://psgim.ac.in/2017/01/full-time-faculty/'
```

get the page contents using html.parser

In [6]:

```
imPage = requests.get(url)
content = BeautifulSoup(imPage.content, 'html.parser')
```

Select the 'div a' section and print the lines beginning with 'DR'

In [7]:

```
for line in list(content.select('div a')):
    str = line.text;
    if((len(str)>0)and(line.text[0]=='D')and(line.text[1]=='R')):
        print(line.text)
```
