In this exercise, we read and display the names of faculties who have Doctorates from the psg IM web page. For this, we use requests and BeautifulSoup libraries

In [1]:

```
import requests
```

In [2]:

```
from bs4 import BeautifulSoup
```

In [3]:

```
page=requests.get('http://psgim.ac.in/2017/01/full-time-faculty/')
```

In [7]:

```
text=BeautifulSoup(page.content,'html.parser')
```

In [9]:

```
for t in list(text.select('div a')):
    s = t.text;
    if((len(s)>0)and(t.text[0]=='D')and(t.text[1]=='R')):
        print(t.text)
```
